Fakhri Djamaris

Software Developer | iOS Development | Machine Learning

Batam, Indonesia | +62 819 5924 3545 | djamarisfakhri@gmail.com | LinkedIn | Portfolio

SUMMARY

Learner at Apple Developer Academy @ Infinite Learning in Batam, building iOS apps with SwiftUI in cross-functional teams, from user research to features running on physical devices (authentication, LiDAR 3D modeling, jetlag scheduling). Holds a D3 in Informatics Engineering from the University of North Sumatra (GPA 3.86/4.00). Experienced as a freelance developer in building and deploying web applications and machine learning services (TensorFlow, FastAPI, Google Cloud Run), and completed an internship at LLDIKTI Region I working with institutional data. Seeking a role in digital product development, in mobile engineering or Data/ML, while learning from experienced teams.

EDUCATION

University of North Sumatra (USU) | Medan, Indonesia
Associate Degree (D3) in Informatics Engineering (August 2022 - July 2025)

- **GPA:** 3.86/4.00
- **Final Project:** *Opening Chess Recommender System*, an individual machine learning microservice for real-time opening recommendations

Apple Developer Academy @ Infinite Learning | Batam, Indonesia
Learner, iOS App Development, UI/UX and Design Thinking (February 2026 - Present)

PROFESSIONAL EXPERIENCE

Apple Developer Academy @ Infinite Learning | Batam, Indonesia
*iOS Developer (Learner) (February 2026 – **Present**)*

- Developed iOS features in three Academy projects using SwiftUI, ARKit, RealityKit, Combine and Firebase: authentication and user profile for Step Up, a LiDAR proof of concept for Petner delivered to TestFlight, and a complete jetlag adaptation app for Nazeit, built individually.
- Contributed user research and UI/UX design in Sketch to Redire, a 10-person team project, including observations, interviews and iteration on Academy review feedback.
- Ran the full Design Thinking process, from user research and ideation to prototyping and testing, in cross-functional teams of developers and designers.
- Collaborated through Git, including branches, pull requests and resolving merge conflicts.

Freelance | Remote, Indonesia
*Web Developer and Machine Learning Developer (December 2025 – **Present**)*

- Developed and tested web applications for clients, including accounting systems and digital library platforms.
- Validated data and ran quality assurance on client databases to protect data integrity during migrations.
- Debugged and refactored legacy PHP/Laravel codebases to improve system stability.
- Deployed web applications to Linux VPS servers with manual server configuration.

LLDIKTI Region I | Medan, Indonesia
Internship Trainee, Institutional Division (July 2024 – August 2024)

- Collected, processed and recapped data on universities under LLDIKTI Region I.
- Kept institutional data accurate, consistent and accessible.
- Presented key university data in a structured, easy-to-read format for internal use and reporting.

ORGANIZATIONAL EXPERIENCE

Google Cloud Roadshow x Build With AI Medan 2025 | Medan, Indonesia
Facilitator (26 April 2025)

- Guided workshop participants through Google Cloud Platform and Langflow learning modules.
- Assisted attendees during exercises involving BigQuery and Langflow workflows.

PROJECTS

- **Redire (2026),** 10-person team: research and UI/UX for an app that helps workers regain focus after scrolling breaks, built on FamilyControls and ActivityKit. Prototype
- **Petner (2026),** 5-person team: LiDAR proof of concept (ARKit, RealityKit) turning real-world scans into 3D pet models; build delivered to TestFlight. GitHub | TestFlight
- **Nazeit (2026),** individual build: 3-phase jetlag adaptation engine (Pre-flight, In-flight, Recovery) generating sleep schedules from flight routes, with SwiftUI, Combine and MapKit. GitHub
- **Step Up (2026),** 5-person team: authentication and User Profile for a micro-exercise tracker, syncing timer, streak and leaderboard data with Firebase Firestore. GitHub
- **Opening Chess Recommender System (2025),** individual: machine learning microservice for real-time opening recommendations, optimized for low latency, with Python, FastAPI and Google Cloud Run (live demo offline).

HONORS, AWARDS & SKILLS

- **Certifications:** Membuat Sistem Informasi Pariwisata Berbasis Website, BNSP (2025) Certificate
- Dev Certified for Machine Learning with TensorFlow (DCML), dev.id (2025) Certificate
- Bangkit Academy 2024 Batch 2, Machine Learning Path, MSIB Batch 7 (2024) Certificate | GitHub
- Data Science Basics, Celerates Indonesia, MSIB Batch 6 (2024) Certificate | GitHub
- **Technical Skills (iOS):** SwiftUI, SwiftData, UIKit, ARKit, RealityKit, WidgetKit, ActivityKit, Combine, Firebase Firestore, Git
- **Technical Skills (ML and Backend):** Python (FastAPI), TensorFlow, Deep Learning, Computer Vision (YOLO/CNN), CoreML, Gemini API, SQL, PostgreSQL, MySQL, ETL Pipelines
- **Technical Skills (Web and Cloud):** PHP/Laravel, Next.js, React, Vue.js, Prisma ORM, Google Cloud Platform (Cloud Run, Cloud Build, Cloud Storage), Docker, CI/CD
- **Interpersonal Skills:** Cross-functional collaboration, facilitation, Design Thinking
- **Languages:** Indonesian (native), English (limited working proficiency)
